

CLAIMS

What is claimed is:

1. A modular entertainment system comprising a multi-function dome light with two ends with a DVD player electrically connected to a first end of said multi-function dome light and a flip-down display electrically connected to a second end of said multi-function dome light wherein the modular entertainment system replaces and installs in place of an original dome light in a vehicle.
2. A modular entertainment system as in claim 1, wherein said DVD player is interchangeable with another DVD player.
3. A modular entertainment system as in claim 1, wherein said flip-down display is interchangeable with another flip-down display.
4. A modular entertainment system as in claim 2, wherein said flip-down display is interchangeable with another flip-down display.
5. A modular entertainment system as in claim 1, wherein said multi-function dome light has a built-in neon light.
6. A modular entertainment system as in claim 5, wherein said multi-function dome light with the built-in neon light may be turned on and off as desired and is also synchronized to flash with the rhythm of the music in the vehicle.
7. A modular entertainment system as in claim 2, wherein said multi-function dome light has a built-in neon light.
8. A modular entertainment system as in claim 7, wherein said multi-function dome light with the built-in neon light may be turned on and off as desired and is also synchronized to flash with the rhythm of the music in the vehicle.

9. A modular entertainment system as in claim 3, wherein said multi-function dome light has a built-in neon light.

10. A modular entertainment system as in claim 9, wherein said multi-function dome light with the built-in neon light may be turned on and off as desired and is also synchronized to flash with the rhythm of the music in the vehicle.

11. A modular entertainment system as in claim 4, wherein said multi-function dome light has a built-in neon light.

12. A modular entertainment system as in claim 11, wherein said multi-function dome light with the built-in neon light may be turned on and off as desired and is also synchronized to flash with the rhythm of the music in the vehicle.

13. A modular entertainment system comprising a DVD player electrically connected to a flip-down display wherein the modular entertainment system replaces and installs in place of an original dome light in a vehicle.

14. A modular entertainment system as in claim 13, wherein said DVD player is interchangeable with another DVD player.

15. A modular entertainment system as in claim 13, wherein said flip-down display is interchangeable with another flip-down display.

16. A modular entertainment system as in claim 14, wherein said flip-down display is interchangeable with another flip-down display.
